

Natural Refrigerants Market Forecast

*Commercial & Industrial Refrigeration in Europe, U.S. and Japan
(2021-2030)*

Table of contents

About Us	9
Publisher's Note: An Informed Look at the Present – and Future	11
Introduction	13
Methodology	14
Executive Summary	16
Market Forecast, 2021-2025	17
List of Acronyms	20
List of Natural Refrigerants	21
Key Trends Affecting Growth of Natural Refrigerant Systems	22
1. Economic Trends	24
1.1. Global Economic Growth	24
1.2. Regional Economies	25
1.2.1. Europe	25
1.2.2. United States	25
1.2.3. Japan	25
1.3. Global Refrigeration Equipment Market	25
2. Policy Trends	26
2.1. Europe	27
2.1.1. Fit for 55	27
2.1.2. EU F-Gas Regulation Review Underway	29
2.1.3. EU Energy Labelling	30
2.1.4. HFC Tax (Member State Level)	30
2.1.5. Brexit and United Kingdom's F-Gas Regulation	30
2.1.6. Hydrocarbon Charge Limits	31

2.1.7. HFCs and HFOs May Be Restricted Under REACH	31
2.2. U.S.	32
2.2.1. The AIM Act	32
2.2.2. Kigali Amendment Ratification Pending	33
2.2.3. Hydrocarbon Charge Limits	33
2.2.4. California's HFC Emissions-Reduction Plan	33
2.3 Japan	34
2.3.1. Phase Outs and Phase Downs	34
2.3.2. Natural Refrigerant Subsidy Scheme	35
2.3.3. High Pressure Gas Safety Act	35
2.3.4. Standards for Hydrocarbon Cases	35
3. General and Refrigerant-Specific Trends Affecting Growth	36
3.1. General Trends	37
3.1.1. COVID-19	37
3.1.2. 2021 Business Disruptions	38
3.1.3. Race to Net Zero	38
3.1.4. Rise of Online Grocery Shopping	39
3.1.5. Competition from HFOs	39
3.1.6. Clean Cooling: A New Standard for Sustainable Cooling	41
3.1.7. Growth of Frozen and Fresh Foods Boosting Refrigeration	41
3.1.8. Maintenance, Upgraded Components, and NatRefs Drive Efficiency	42
3.1.9. Cooling-as-a-Service Gaining Popularity	42
3.1.10. Digitalization Is Crucial to Cost Cutting and NatRef Adoption	43
3.1.11. NatRef Training Will Become a Commodity	43
3.2. CO₂ Trends	44
3.2.1. The Impact of Market Leaders	44
3.2.2. CO ₂ Efficiency in Warm Climates	44
3.2.3. The Rise of Integrated CO ₂ Systems	45
3.2.4. CO ₂ in Smaller Stores	45

3.2.5. Transcritical CO ₂ Moves into the Industrial Market	46
3.3. Hydrocarbon Trends	47
3.3.1 The Many Uses of Hydrocarbon Cases	47
3.3.2. Variable-Speed Compressors Boost Efficiency	48
3.3.3. Improved Heat Exchanger Design	48
3.4. Ammonia Trends	48
3.4.1. The Rise of Low-Charge Ammonia	48
3.4.2. Ammonia/CO ₂ : Still Rare, But a Growing Possibility in Supermarkets	49
Market Data and Growth Forecast	50
4. Commercial Refrigeration	51
4.1. Global	52
4.1.1. Transcritical CO ₂	52
4.1.2. Hydrocarbons	52
4.1.3. Ammonia	54
4.2. Europe	55
4.2.1. Total Addressable Market	55
4.2.2. Transcritical CO ₂	56
4.2.3. Hydrocarbons	59
4.2.4. Ammonia	61
4.3. U.S.	62
4.3.1. Total Addressable Market	62
4.3.2. Transcritical CO ₂	62
4.3.3. Hydrocarbons	65
4.3.4. Ammonia	67
4.4. Japan	68
4.4.1. Total Addressable Market	68
4.4.2. Transcritical CO ₂	68
4.4.3. Hydrocarbons	70
4.4.4. Ammonia	71
5. Industrial Refrigeration	73

5.1. Global	74
5.1.1. Transcritical CO ₂	74
5.1.2. Low-Charge Ammonia	75
5.2. Europe	76
5.2.1. Transcritical CO ₂	76
5.2.2. Low-Charge Ammonia	79
5.3. U.S.	82
5.3.1. Transcritical CO ₂	82
5.3.2. Low-Charge Ammonia	85
5.4. Japan	88
5.4.1. Transcritical CO ₂	88
5.4.2. Low-Charge Ammonia	91
6. Beyond Vapor Compression – Potentially Disruptive Innovations	94
6.1. Thermoelectric Cooling	95
6.2. Thermoacoustic Cooling	95
6.3. Radiative Cooling	95
6.4. Magnetocaloric Refrigeration	96
6.5. Solar-Diffusion Absorption Refrigeration	96
6.6. Twistocaloric Refrigeration	96
Conclusion	98
